Discover why the Zika Virus is not endemic in Uganda!

Have you ever wondered why some diseases that affect people all over the world are named after places in Uganda? Ever wondered why some conditions, such as Zika Virus, which are named after places in Uganda, are not endemic in Uganda? As we prepare to mark 55 years of Uganda's independence, we are set to bring you all the country's untold stories. Therefore, read our lead story to find out how diseases got Ugandan names.

In addition, Ugandan cultures treat suicide victims harshly. Ugandan laws also criminalise suicide. Experts however, suggest that those with suicidal tendencies actually need help than punishment. We bring you the reasons.

Enjoy your week and continue writing to us!
