Disciplined students have high chances of succeeding in life

Church leaders in Uganda today are doing their best to encourage students to observe discipline so that they can be able to perform well in final exams. Disciplined students have high chances of passing examinations. It is today's disciplined students who will be national world leaders of tomorrow. They will also make the world a better place to live in.

It is true that some religious leaders teach in schools in their capacity as

chaplain. They ensure that students grow knowing God and loving each other. Besides, religious leaders are mirror of Christian virtues and values that students should acquire while at school.

For instance, parents appreciate the guidelines and wisdom approach the Kabale Diocese Vicar General Msgr Siler Twinomugisha took to encourage the 33 students of St Mary's College Rushoroza in Kabale Municipality, who

have been admitted to different universities on government sponsorship

He was pleased to learn that the school head teacher, Mr Remegio Byamugisha in Kabale Diocese Catholic schools had boys and girls who passed their examinations very well.

The vicar general thanked parents for bringing up well their children.
