Police and army should remain non-partisan during elections

Nowhere in history have the guns, army and police ever defeated the will of the people when the time for change comes. I am sure those who fought in the NRA War know this very well. They were few but defeated a national army in the war there after because they had the support of the people.

We all know how hard it is to lose power especially after 30 years in comfort but if the current govern-

ment is defeated, please don't use our police or army to cause anarchy. We need to safeguard the little we have achieved over the years and move our country to another level.

Those who are believers, both Jesus Christ (son of God) and Prophet Mohammed (Father of Islam) did not solve every problem before leaving the stage. Neither did Mao Zedong or George Washington.

Even Adolf Hitler who built the

strongest army on the European continent and the world ended up in suicide, don't forget our Muammar Gaddafi who I believe had taken Libya to another level of development but forgot one aspect of people and politics. I appeal to the police and army to be professional regardless of who wins. There is no bad peace or good war.
