Kamuli children tipped on conduct, environment

BY OPIO SAM CALEB

Term One closed on a high note with Kamuli Children celebrating with the big people, role models and dignitaries.

The Bishop of Busoga Diocese, Rt Rev Dr Prof Grace Lubaale interacted with pupils of Starlight and Kamuli Girls Primary Schools where he took them through tree planting and co-curricular activities as focus for all round education.

The bishop counselled children to get out of imagination, manage

things in time, focus on the future by having clarity of what they want, use talents, acquire skills for a brighter future.

"God gave you talents so do not sit on them, acquire more skills, remain relevant and respectful because Commandment Number 5 has a promise that respect your parents and your days will be added. These elders hold the blessings for you," the bishop said.

On tree planting and other co-curricular activities, the bishop encouraged learners to plant more fruit, medicinal and shade trees both at institutions,

home and community for climate change resilience, protection and nutrition.

Kamuli District chairperson Kaloli Dhizaala appreciated the children who joined him in *Bulungi Bwansi* (community maintenance service), encouraging them to always take part in voluntary community services such as the Scout Good turn.

He asked them to transfer the spirit home by helping in family chores, cleaning the churches and helping the poor which he said brings blessings from God.

Pupils look on as the Bishop Grace Lubaale plants a tree.

The rotary team also gave children freebies to enjoy.

Mr Kaloli enjoys a photo moment with the children.
