Nabuyonga pupils visit children with neurological conditions

BY PHOEBE MASONGOLE

Pupils of Nabuyonga Primary School recently visited children receiving care at CURE Uganda. As neighbours, the school has made it a tradition to visit CURE Uganda each year to show love and support for the children. CURE

Children's Hospital of Uganda, in Mbale, treats children with conditions such as hydrocephalus, spina bifida, brain tumors, epilepsy, and other neurological challenges. During the visit, the pupils prayed with the caretakers and encouraged them, showing care and support for families facing health difficulties.

The pupils also toured the wards, spending time with the

children and gifting them toys and small treats.

They learnt more about the work done at CURE Uganda, where children receive treatment, therapy, and care to help them live healthier lives.

The visit left both the pupils and families feeling happy, encouraged, and hopeful for the future.

Learners pray for a caretaker and her baby during the visit.

Some of the pupils' representatives present gifts for the caretakers.
